Dear Colleague,

It is our honor that we have this opportunity to host the 10th International Vanadium Symposium: Chemistry, Biological Chemistry, & Toxicology (V10) to be held from November 6 to November 9, 2016 at Howard Civil Service International House, Taipei, Taiwan.

On behalf of the Organizing Committee, we cordially invite you to participate in this upcoming exciting event. The theme of the symposium is vanadium related research that will try to cover coordination chemistry, speciation, biological chemistry, toxicology, enzymology, catalysis, therapeutic applications, batteries, novel materials, and environmental/occupational exposure to V agents but not limited in these areas. This symposium follows the previous successful symposia that were held at Cancun (1997), Berlin (2001), Osaka (2003), Szeged (2004), San Francisco (2006), Lisbon (2008), Toyama (2010), Washington (2012), Padova (2014) to provide a platform for researchers working with vanadium to show case their research results, to share experience, and to find opportunity to have interdisciplinary collaboration. In addition, you will discover the colorful attractions in Taipei. To learn more about the symposium and scientific program, please visit V10 website at http://www.chem.nthu.edu.tw/files/13-1078-98859.php?Lang=zh-tw

While the website is still evolving, many of the main details are there. It is there where you could obtain an abstract template, learn about the venue and housing, and register for the symposium. We will appreciate it very much if you would forward this message to your friends or colleagues who are working with vanadium species. Certainly, if you have any questions about the symposium, please do not hesitate to contact us at v10@my.nthu.edu.tw.

We are looking forward to seeing you in November 2016 at Taipei.

Sincerely yours,

V10 Chairs,
Biing-Jiun Uang, National Tsing Hua University
Chien-Tien Chen, National Tsing Hua University
Hua-Fen Hsu, National Cheng Kung University
